Please amend claims 10, 11, 12, 13, 14, 15, and 18 as follows:

(10) (Currently Amended) ~~The A system as set forth in claim 1 wherein the system further comprises~~ comprising:

a first module configured to convert input text to audible speech in a selected language, the audible speech indicative of a model;

a second module synchronized to the first module, the second module producing an animated image of a human face and head pronouncing the audible speech;

a user interface positioned to receive utterances spoken by a user in response to

a prompt to replicate the audible speech;

a third module configured to recognize the utterances and provide feedback to the user, the feedback being comprised of at least one of a score, an icon and an audio segment reflecting a precision at which the user replicates the speech in the selected language based on a comparison of the utterances to one of the audible speech and the model; and

a record and playback module.

11. (Currently Amended) The system as set forth in claim 4 10 wherein the system further includes a table storing mapping information between word subgroups and vocabulary words.

12. (Currently Amended) The system as set forth in claim 4 10 wherein the system further includes a table storing mapping information between words and vocabulary words.

13. (Currently Amended) The system as set forth in claim 4 10 wherein the system further includes a table storing mapping information between words and examples of parts of speech.

14. (Currently Amended) The system as set forth in claim 4 10 wherein the system includes tables of punctuation.

15. (Currently Amended) The system as set forth in claim 4 10 wherein the system includes specific pronunciation files.

16. (Canceled)

17. (Canceled)

18. (Currently Amended) The method as set forth in claim 4 ~~7~~ 19 further comprising receiving the input text from one of a network, a stored lesson file, a scanner, and the internet.

19. (Currently Amended) ~~The A method as set forth in claim 17 wherein for~~
voice interactive language instruction comprising:
converting input text data to audible speech data;
generating audible speech comprising phonemes based on the audible speech
data;
outputting the audible speech through an audio output device;
generating an animated image of a face and head pronouncing the audible
speech;
synchronizing the audible speech and the video image;
prompting a user to replicate the audible speech;
recognizing utterances generated by the user in response to the prompting;
comparing the audible speech to the utterances; and,
providing feedback to the user based on the comparison, the feedback being
comprised of at least one of a score, an icon and an audio segment reflecting a
precision at which the user replicates the audible speech and the feedback comprises
providing being further comprised of a playback of selected portions of the audible
speech and utterances.
